Installation Instructions

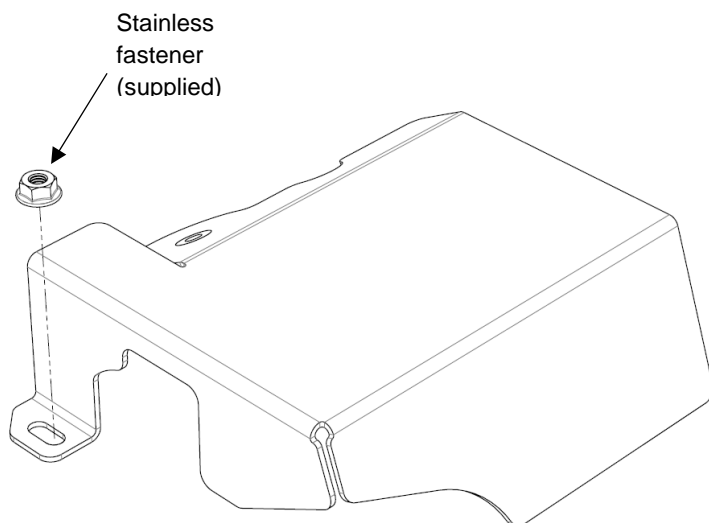

The DaveFab ECU Splash Guard is designed to be fitted if the factory air intake has been removed, exposing the ECU wiring and connectors.

1. Install the DaveFab ECU Splash Guard

- 1.1. Remove the M6 nut on the left side of the ECU housing.
- 1.2. Locate the boss on the underside of the guard into the rubber mounting originally used to locate the airbox.
- 1.3. As you push the boss into the rubber mounting align the slotted tab over the thread on the left side of the ECU.
- 1.4. Use the M6 nut supplied to secure the guard in place.
